PROFESSIONAL EXPERIENCE

Edundy — Full Stack Developer
Remote - USA │ 2025 – 2026

- Development of an educational application focused on school and academic management.
- Responsible for frontend development using React, Next.js, and TypeScript, and collaboration on backend tasks with Node.js and REST APIs.
- Integration of Artificial Intelligence solutions for the automatic generation of assignments and grading of work, optimizing teaching time and improving the educational experience.
- Close collaboration with the product team, focusing on usability, performance, and code maintainability.

Owner Built — Full Stack Developer
Remote - USA │ 2024 – 2026

- Development of a process management platform for the construction industry, actively used by multiple users in production environments.
- Design and implementation of REST APIs using Node.js, Prisma, and PostgreSQL.
- Full stack architecture development with Next.js and TypeScript.
- Modeling and implementation of complex business logic (projects, tasks, reports, costs).
- Performance optimization, code maintainability, and user experience improvements.
- Collaborative work with a strong product mindset and continuous improvement focus.

Mutual AMR — Frontend Developer / Full Stack Support
Rosario, Argentina │ 2023 – 2025

- Participation in the migration of institutional websites using Next.js, integrating legacy .NET systems.
- Consumption and integration of REST APIs with SQL Server databases.
- Development of responsive and accessible user interfaces.
- Collaboration with infrastructure teams for deployments and maintenance.
- Resolution of technical tickets and internal user support during technology transition processes.

Endava — Backend Developer
Rosario, Argentina │ 2022 – 2023

- Development of REST APIs with Node.js for production systems.
- Implementation of authentication and authorization using JWT.
- Query optimization and performance improvements in Firestore.
- Work under quality standards, best practices, and team collaboration.
